

48/4024 3-D Pumpkin Wreath Craft Kit

Be sure to have adult supervision if using a glue gun for this craft.

1. Glue up to twelve foam leaves onto the foam ring.
2. Using a pencil (not included), carefully poke a hole into the top of each foam pumpkin.
3. Add a drop of glue to the end of a green chenille stem and insert the stem into the hole in the pumpkin. Glue a foam leaf to the stem. Repeat this step for the remaining pumpkins, then glue the five pumpkins onto the wreath as shown.
4. To create the 3-D appearance, glue the remaining foam leaves onto the sides of the pumpkins. Glue the fabric bow and the six wood beads onto the wreath and allow time to dry.
5. To make the hanger, glue both ends of the jute cording to the back of the ring. Allow time for your craft to dry.
